

SATYA BHARTI INNOVATEX 1.0

SBIX 1.0

October 17th, 2026

Satya Bharti Adarsh Senior Secondary School, Rauni

INTRODUCTION

ABOUT SBIX 1.0

SBIX 1.0 — Satya Bharti InnovateX 1.0 is an inter-school platform that brings together students to explore robotics, technology, innovation and problem-solving through competitive and hands-on activities.

Why we are Organizing it ?

**To encourage innovation and
creative thinking**

**To develop practical problem
solving skills**

**To connect classroom learning
with real-world applications**

**To promote teamwork and
communication**

RATIONALE & NEED

SBIX 1.0 provides students with opportunities to move beyond textbook learning and apply their knowledge to practical, real-world challenges.

Key Needs

01. Problem-Solving & Critical Thinking

Develop the ability to identify problems, analyse them and find practical solutions.

02 . Creativity & Innovation

Encourage students to think differently and transform ideas into innovative solutions.

03. Cross- Subject Collaboration

Encourage students to combine knowledge from different subjects to solve problems.

04. Showcase Talent

Provide a platform for students to present their skills, ideas and innovations.

VISION & OBJECTIVE

Vision

To create a platform where students can explore robotics, technology, creativity, and innovation; transform ideas into practical solutions; and develop the confidence to solve real-world challenges.

Objective

SBIX 1.0 aims to promote innovation, build technical and problem-solving skills, strengthen teamwork and communication, connect classroom learning with practical applications, encourage peer learning, provide a platform to showcase student ideas, and develop planning and time-management skills.

Expected Skills & Competencies

Critical Thinking | Creativity | Robotics | Technical Skills | Problem Solving | Teamwork | Communication | Presentation | Planning | Time Management

EVENT OVERVIEW

Event Identity

- Official Name: Satya Bharti InnovateX 1.0
- Short Name: SBIX 1.0

Who & Where

- Host: Satya Bharti Adarsh Senior Secondary School, Rauni
- Type: Inter-school competition
- Participants: Bharti Foundation schools + other invited schools

Registration

Registration fee: Free

Classes

- Junior: Classes 6–8
- Senior: Classes 9–12

Participation

- A school may register multiple teams.
- A student may participate in only one competition.

Round 1 — Online Selection Round

- Date: 7 OCT 2026
- Schools submit ideas through PPTs
- Ideas are evaluated
- Selected teams will proceed to the final round.
- Selected teams Announcement: 9 OCT 2026.

Round 2 — Offline Final Round

- Date: 17 October 2026
- Venue: Satya Bharti Adarsh Senior Secondary School, Rauni (Host School)
- Format: In-Person Competition Finals

COMPETITON STRUCTURE

CATEGORY	CHALLENGES	TEAM SIZE
Junior (6-8)	Tinkercad	1 member
Senior (9-12)	Robo Race	2 members
Junior & Senior	Innovation Challenge	1-2 members
Classes 6-12	AI Quiz	2 members

TINKERCAD

- **Design & Create:** Participants use Tinkercad to design innovative digital circuits and electronic systems using a wide range of virtual components.
- **Simulate & Test:** Participants can build, connect, and simulate their circuits virtually, allowing them to test their ideas and identify errors before creating a physical circuit.
- **Problem-Solving:** The challenge encourages students to apply logical thinking, creativity, and basic electronics concepts to solve a given task.
- **Innovation & Accuracy:** Participants are evaluated on their circuit design, functionality, creativity, proper connections, and ability to complete the given challenge effectively.

TINKERCAD GUIDELINES

1. Guidelines :-

- The circuit design task will be assigned on the spot at the beginning of the challenge.
- Participants must design and simulate the given circuit using Tinkercad Circuits.
- Participants will have 1 hour (60 minutes) to complete the assigned task.
- The completed circuit must be submitted through the official submission link provided by the organizers.
- The submission link will be disabled exactly after 1 hour.
- Late submissions will not be accepted under any circumstances.
- A working internet connection will be provided.

2. Participant Requirements:-

- Every participant must bring their own working laptop.
- Participants must ensure that their laptop has:-
 - A compatible web browser.
 - Access to a Tinkercad account.
- Participants will be responsible for ensuring their laptop is fully charged and ready before the challenge begins.

3 . General Rules:-

- The task must be completed independently.
- Participants must submit their own original work.
- No additional time will be provided for technical issues caused by the participant's device or internet connection.
- Participants must follow the instructions given by the organizers.
- The organizers' decision regarding the challenge and evaluation will be final.

IMPORTANT:-

- TOTAL TIME: 60 MINUTES
- Task Assigned → Design & Simulate → Submit

 Once the 60-minute time limit ends, the submission link will be closed automatically.

ROBO RACE

- **Build & Compete:** Participants design and build their own customised robots to compete on a challenging race track filled with obstacles and hurdles.
- **Speed & Control:** Robots must navigate the complete track efficiently while maintaining accurate control, balance, and movement throughout the race.
- **Strategy & Precision:** The challenge tests participants' engineering skills, quick decision-making, problem-solving ability, and precision in handling their robots.
- **Performance & Challenge:** Teams earn points by successfully crossing hurdles, while penalties may be applied for skipped obstacles or additional touches. The winner is determined based on overall performance, points, and completion time.

ROBO RACE GUIDELINES

1. Team Size

- Each team can consist of 1-2 participants.
- Only registered team members are allowed to operate the robot.
- The robot/car must be designed and customised by the participating team.
- Length: 30 cm, Width: 30 cm,
- Height: 30 cm
- Each successfully completed hurdle will earn the team 10 points.

2. Touch Rule

- The robot is allowed to touch a hurdle once without penalty.
- For every additional touch of the same hurdle, 5 points will be deducted.
- Teams should carefully control their robot to avoid unnecessary contact with hurdles.
- Skipping a hurdle will result in negative 5 points.
- A team must complete the hurdles in the designated sequence.
- The total time taken to complete the course will be recorded.
- Teams should aim to complete the course as quickly as possible while successfully navigating all hurdles.
- Faster completion with fewer penalties will be provided.

3. The winner will be determined based on:

- **Scoring Metrics:** Final standings are determined by Total Points Earned, less Penalty Deductions, factored against Course Completion Time and Successful Hurdle Clearances.
- **Participant Compliance:** Competitors must strictly follow all directive instructions from organizers and judges at all times.
- **Fair Conduct:** Any attempt to compromise fair play will result in disqualification.
- **Rulings:** All decisions of the judging panel will be final.

INNOVATION CHALLENGE

- **Original Idea:** Present a unique and creative idea that addresses a real-world problem or need. **Problem & Solution:** Clearly identify the problem and explain how your innovation provides an effective solution.
- **Working Model:** Showcase a prototype, working model, or demonstration to explain how the idea functions.
- **Technology & Creativity:** Use technology, engineering, AI, robotics, or other suitable approaches to enhance the innovation.
- **Practical Impact:** Demonstrate how the solution can be useful, affordable, sustainable, or applicable in real-life situations.
- **Presentation:** Explain the concept, working, components, applications, and future possibilities clearly to the judges.
- **Evaluation:** Projects are assessed on innovation, creativity, functionality, practicality, technical understanding, and presentation.

THEMES FOR INNOVATION CHALLENGE

AI & DIGITAL INNOVATION

- *How can AI make our city smarter*
- *Design a responsible AI solution for a real world challenge*
- *Build an AI Solution for a community problem*

ENVIRONMENTAL SUSTAINABILITY

- *How can we reduce waste and save water*
- *Design a solution for a local environmental problem*
- *Develop a data-driven sustainability solution*

HEALTHCARE & HEALTHTECH

- *Early detection & smart monitoring*
- *Better recovery & rehabilitation*
- *Healthcare for everyone*

AGRICULTURE & AGRITECH

- *Smart farming with robotics*
- *Healthy food, sustainable resources*
- *AI for better crops*

INNOVATION CHALLENGE GUIDELINES

- The project idea must be **original and innovative**.
- Copied or replicated ideas will not be accepted.
- Team Size: **1–2 members per team**.
- A **working prototype** is compulsory on event day.
- Each team will get **4 minutes to present their project**.
- This will be followed by **3 minutes for questions and answers by the jury**.
- There will be **one winning team** from the **Junior category** and one winning team from the **Senior category**.

TWO-ROUND PROCESS

ROUND 1 — ONLINE SELECTION

Date: 7 OCT 2026

- Schools submit their ideas through PPTs.
- Innovation ideas are reviewed for selection.
- Working prototype is NOT compulsory for the online idea submission.
- Announcement of selected teams qualify for the offline final.
- Selected list will be announced on **7 OCT 2026**

ROUND 2 — OFFLINE FINAL

Date: 17 October 2026

- Selected participants must report at the host school.
- PPT is compulsory for Innovation.
- Working prototype is required for the offline Innovation final.
- Jury interaction and competition activities will be conducted in person.
- Participants must bring all required components and materials.

NOTE: This is only for INNOVATON CHALLENGE

AI QUIZ

- **AI Fundamentals:** Test participants' understanding of Artificial Intelligence, its concepts, applications, and real-world uses.
- **Machine Learning & Data:** Questions cover machine learning, data, algorithms, models, training, and basic AI processes.
- **AI Technologies:** Explore topics such as Computer Vision, Natural Language Processing, Robotics, Generative AI, and Neural Networks.
- **Problem-Solving:** Participants apply logical thinking and analytical skills to answer scenario-based and concept-based AI questions.
- **Emerging Technology:** Questions may include modern AI developments, responsible AI, automation, and the impact of AI on different fields.
- **Speed & Accuracy:** The challenge tests participants' knowledge, quick thinking, decision-making, and ability to respond accurately under time constraints.
- **Overall Performance:** Participants are evaluated based on correct answers, accuracy, knowledge, and response time.

OVERALL GUIDELINES

- **REPORTING TIME**- 8:00 AM TO 9:00 AM
- **DRESS CODE**- BLACK PANTS AND WHITE SHIRT
- **Accessories & Gadgets:** Participants must bring all required accessories and gadgets, such as **extension boards, chargers, adapters, etc.** No such equipment will be provided by the school.
- **Originality:** No idea should be repeated or duplicated for the Innovation competition.
- **Discipline:** Any form of indiscipline by participants will not be tolerated.
- **Photography/Videography:** Photography and videography are strictly prohibited inside the school campus.
- **One team is compulsory for all events from each school.**

Proposed Work Plan

STEP 1 — FINALISE

- Approve event identity, vision, objectives and competition list.
- Confirm eligibility, team sizes and themes.
- Confirm dates and final schedule.

STEP 2 — BUILD

- Prepare detailed rules.
- Create registration process.
- Prepare brochure, invitation and promotion material.
- Assign organising responsibilities.

STEP 3 — EXECUTE

- Conduct online selection.
- Announce selected teams.
- Prepare venue, volunteers and resources.
- Conduct offline final and document outcomes.

DEPARTMENTAL HEADS

DEPARTMENTS	STUDENT	TEACHER
Overall	Vansh Verma	Chandan Prajapati
Discipline	Arshpreet Singh	P. E. Department
Technical	Jasmanpreet Singh	Amninder Singh
Hosting Hub	Harnoor Kaur	Harpreet Kaur
Registration	Nimrat Kaur	Dhanjeet Kaur
Guidance & Queries	Ritika Modgill	Dhanjeet Kaur
Decoration	Gitika Sharma	Sapreet Kaur
Design & Display	Amandeep Singh	Chandan Prajapati
Venue Management	Sidakpreet Kaur	Navdeep Kaur

Refresment	Gurleen Kaur	Jaisleen Kaur
Cultural (Bhangra)	Aamin	Manjit Singh
Cultural (Music)	Armaan Singh	Jasroye
Cleanliness	Kirandeep	Meenu Agarwaal
Hospitality	Tanish Verma	Kamaljeet Kaur
Finance	Ritika Modgill	Rajveer Kaur
Photography	Dilpreet Singh	Gurpreet Singh
Documentation	Gurdev Singh	Kamaljeet Kaur

Submission Information

- Last date of submission on 1 OCT 2026.
- Each school must submit minimum 4 ideas combining junior & senior.
- Result declaration will be done on 3 OCT 2026.
- The selected teams will be informed about their selections via E-mail.

Submission QR for other events

- Robo-race
- AI-Quiz
- Tinker-cad
